Perceptron Review

[TODO: IMAGE OF PERCEPTRON]

- Perceptrons are neural computation units which make *weighted* decisions:

$$p(\boldsymbol{x}) = \begin{cases} 1 \text{ if } \sum w_i x_i + b \geq 0 \\ 0 \text{ otherwise} \end{cases}$$

- Perceptrons are not powerful enough, as seen last time with XOR.
- What if we want real valued output for tasks like predicitng the temparature or stock prices?
